BERNER ChemoSorb-Pad

The product

Test with 3 litres of replacement liquid

- The BERNER ChemoSorb-Pad takes up large amounts of liquid (up to 3 litres).
- The liquids are transformed inside the pads into a gel-like compounds (similar to a bab's nappy).
- For larger amounts, after a duration of only ca. 1 or 2 minutes the now drip-proof pad can be disposed of professionally.
- Smaller amounts are immediately locked inside the pad.

BERNER ChemoSorb-Pad
