

Reliable protection for the safe disposal of cytostatic agents

BERNER

safety systems
made in Germany

For your safety in emergencies

During accidents involving carcinogenic substances, it is extremely important to have reliable protective and cleaning equipment close at hand! Our reliable emergency cleaning kit **BERNER SpillKit Z⁺** contains cytostatic protective clothing, tools, an accident report form, and much more - leaving you perfectly equipped to deal with accidents involving cytostatic agents.

Certified protection to the highest standard

For your personal safety you can never take too many precautions. We therefore place the greatest emphasis on ensuring that the most important certificates have been obtained for all the relevant products. In addition, production is regularly reviewed by the employers liability association and the TÜV (Technical Inspection Authority). After all, your health is at stake!

All you need for your personal safety

The **BERNER SpillKit Z⁺** contains everything you need for your personal protection when dealing with the disposal of spilt cytostatic agents. You will receive a complete set of personal protective equipment, consisting of a cytostatic gown, cytostatic protective gloves, a second pair of gloves, FFP3 respirator mask, safety goggles and overshoes. So that you will be reliably protected from head to toe.

Comfortable and easy to use

Included with the **BERNER SpillKit Z⁺** are all the necessary tools for the disposal of spilt cytostatic agents. The tearproof ISYSOFT wipes and the highly absorbent ChemoSorb pad are ideal for taking up and cleaning contaminations. The cardboard box can be used as a scoop and sweeper, two waste bags for the safe disposal of contaminated material are enclosed.
