

# SATWIPES® Instructions

To use the **SATWIPES®** cleaning system, you will need one (1) **SATWIPES®** reusable canister and one (1) **SATWIPES®** pouch.

**1**

Open **SATWIPES®** pouch by gently tearing notch at top of package.

**2**

Unscrew lid from **SATWIPES®** canister. Remove roll from pouch and place in canister. Pull up center wipe.

Push/pull center wipe through the opening on the underside of the canister lid.

**3**

Once wipe is through the opening, screw lid onto canister. Pull wipers out of canister as needed.

**4**

Make sure the **SATWIPES®** lid is secure. Solvent vapors will escape if the canister is left slightly open.

**5**

Use **SATWIPES®** wipers to clean the surface on which you are working. For the most consistent surface contact, use wipers flat or folded.

For hazardous materials information, refer to MSDS sheets on file. MSDS sheets are also available at [www.contecinc.com](http://www.contecinc.com).
