

VertiKlean® MAX™ Mop Wipe System

Versatile, lightweight mop for multiple controlled environment applications

Contec's VertiKlean MAX Mop Wipe System offers a quick and easy solution to mopping floors, walls, and other flat surfaces in any controlled environment. This versatile mop works with a variety of Contec mop wipe covers enabling the user to customize the mop to the cleaning task.

Dry and presaturated disposable wipe covers fit over the VertiKlean MAX foam mop head and frame to remove contamination such as powder, dirt, and dust from floors, walls, and ceilings. The VertiKlean® mop cover frame easily attaches to any Contec QuickConnect™ handle.

The VertiKlean MAX Mop Wipe System provides excellent surface contact and conformity. It can be used to apply disinfectant solutions to surfaces when used with a bucket and wringer. Most importantly, when used for disinfection, the mop wipe covers entrap microorganisms, enabling them to be removed from the environment completely with each change of wipe cover.

The mop cover frame may be sterilized by most common methods including gamma irradiation, ethylene oxide, or autoclave (recommended cycle is 121°C for 30 minutes).

APPLICATIONS

- Ideal for cleaning floors, walls, and ceilings in any controlled environment to ISO Class 5.
- Use with a variety of Contec dry and presaturated wipes for dry or wet mopping or disinfectant application.

For maximum versatility, Contec offers many dry and presaturated wipe mop covers for the 2652K VertiKlean MAX Mop Wipe Frame. Our sales representatives can assist you in selecting the best wipe mop cover for your cleaning or disinfecting task.

VertiKlean® MAX™ Microfiber mop head

Single Use VertiKlean foam mop head with maximum absorbency, **Medium**

Description

The VertiKlean MAX single use microfiber mop head is used with existing VertiKlean hardware for wet cleaning walls and ceilings in sterile and non-sterile environments. Lightweight and easy to maneuver and laser cut for clean sealed edges.

Featuring a microfiber fabric laminated to a single layer of hydrophilic foam for unmatched absorbency. The foam head is backed by a semi-rigid thermoformed plate that easily snaps onto existing VertiKlean frames and provides uniform contact pressure on mopped surfaces. Mop heads are available sterile per AAMI guidelines, and are compatible with a wide range of solutions. Recommended for single use due to possible cross contamination.
