Keeping emergencies safely under control

When accidents involving carcinogenic substances occur, it is extremely important to have reliable protective and cleaning equipment close at hand. The **BERNER SpillKit "XP"** emergency cleaning kit provides everything you need for safe management and disposal of spilt cytostatic agents.

The **BERNER SpillKit "XP"** contains protective clothing, tools, instructions for handling dangerous situations, an accident report form and much more, leaving you perfectly equipped to deal with accidents involving cytostatic agents.

If an accident happens, you won't have to search for long. For maximum safety, we have packed the contents of **BERNER SpillKit "XP"** so that you find them in the order in which you need them. Just below the user information, you will find your personal protective equipment. The reliability of the barrier materials has been proven in comprehensive permeation tests with various chemicals, so you will be completely protected from head to toe.

The **BERNER SpillKit "XP"** is available in three different sizes, as well as latexfree and has everything you need for dealing with any kind of accident. With its contents, you are perfectly equipped to deal with contamination in both liquid and powder form and broken glass.
